

How to measure & track your KPIs?

✗ Measurable Indicators ensure targets can be measured in numbers such as how many new customers, how many sales, how many meetings ... limit emotional indicators

○ Controllable Indicators Ensure the BD sub-targets are manageable and directly related to the achievement of the main targets set

○ Using CRM System Use the CRM system to measure and track BD's activities to optimize working time according to the 80/20 principle. Recommend **Hubspot** because it's free and convenient

✗ Break down the target proactively break down the targets by day, week, month and quarter so that BD can easily monitor the status in each period and have a reasonable improvisation plan. Please download this file [here](#) for BD planning
